

This is just a test doc written in LibreOffice for you students to use testing unoconv in Moodle.  
Add a sentence ... no images or anything fancy ... just text.

Save this file in it's native format. Then save it again in .docx.

Turn in the native format file first - .odt

There will be another assignment like this one in which you should upload the .docx.

Thanks, in advance ... the MoodleMaster!

This is hp's uploaded change.
